Introduction

Salesforce metadata, at your fingertips. Quickly extract Salesforce metadata in Excel files, ex. Field Level Security, Profile permissions across objects, fields etc, Page Layouts , Permission set assignments, Apex, Visualforce. It also offers tools like Org Comparator, and Impact Analysis. It covers FLS, Profile Details, Layout detail, Permission set , Permission set assignment, Apex detail, Approval Process, Custom Application, Static Resource, Visual Flow, Custom Metadata, Object Fields Visibility on Layout.

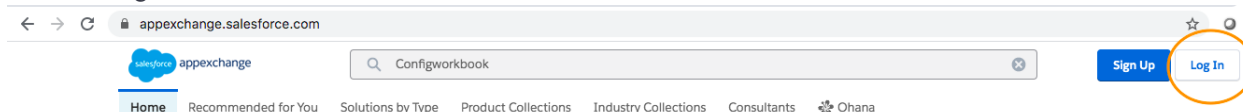

How To Install Config Workbook

CWB Tool can be install 2 ways:

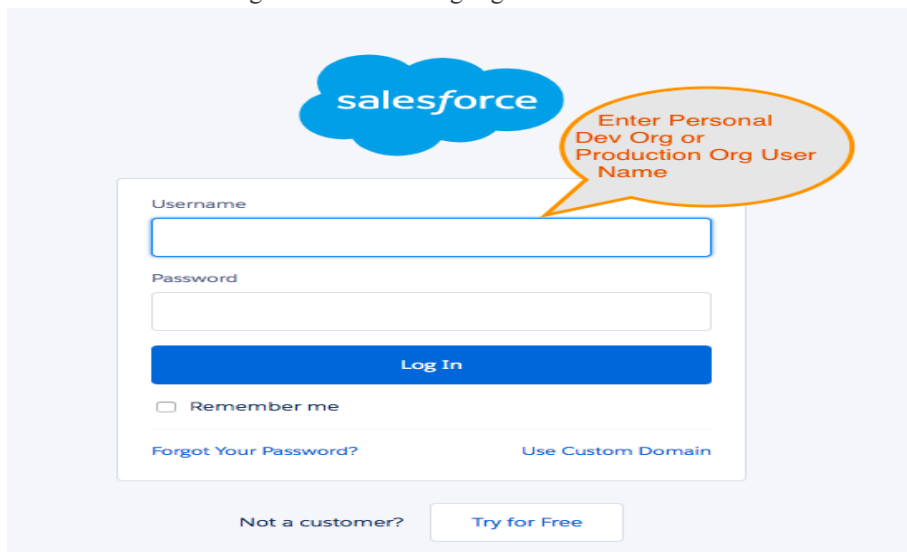

1. From Salesforce AppExchange
2. From <http://configworkbook.com>

Install Config Workbook from AppExchange

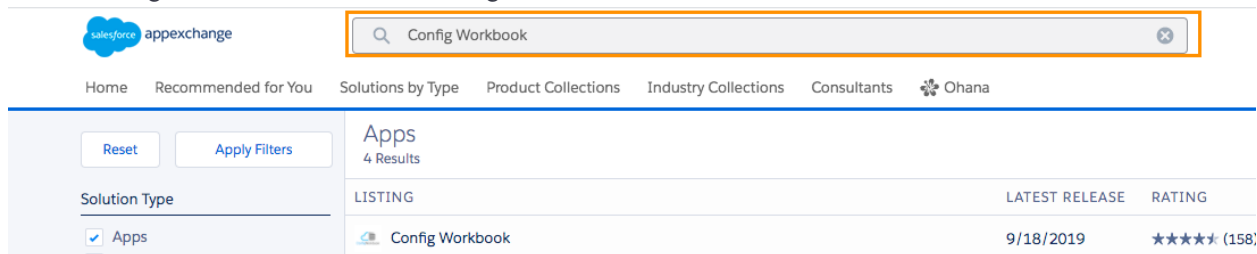

1. Go the <https://appexchange.salesforce.com>
2. Click on Login button

3. Enter Personal Dev Org or Production Org login credential

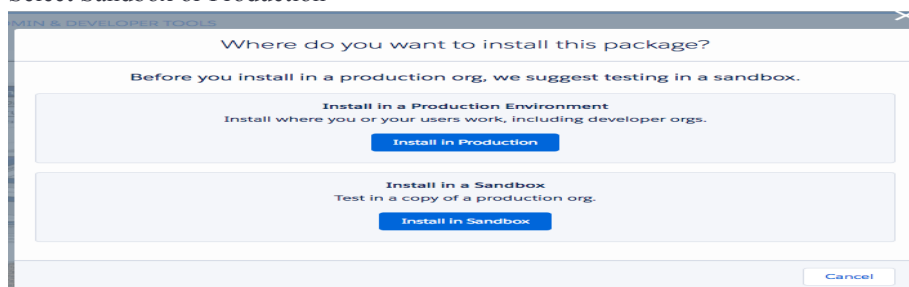

- Search Config Workbook and click on Config Workbook name

The screenshot shows the Salesforce AppExchange search results for "Config Workbook". The search bar at the top contains "Config Workbook". Below the search bar, there are tabs for "Home", "Recommended for You", "Solutions by Type", "Product Collections", "Industry Collections", "Consultants", and "Ohana". On the left, there are filters for "Solution Type" with a "Reset" button and an "Apply Filters" button. The "Solution Type" filter is set to "Apps". The main results area shows "Apps" with "4 Results". The first result is "Config Workbook" with a "LISTING" icon, a "LATEST RELEASE" date of "9/18/2019", and a "RATING" of "★★★★★ (158)".

- Click on **Get It Now**
- Select Sandbox or Production

The screenshot shows a dialog box titled "Where do you want to install this package?". It contains two main sections: "Install in a Production Environment" and "Install in a Sandbox". The "Install in a Production Environment" section has a button labeled "Install in Production". The "Install in a Sandbox" section has a button labeled "Install in Sandbox". There is also a "Cancel" button at the bottom right.

- Click on Confirm and Install

The screenshot shows a "Confirm Installation Details" dialog box. It contains a table with the following information:

Package	Version
SFDC Config Workbook (SFDC Config Workbook / 2.10014.0)	SFDC Config Workbook / 2.10014.0
Subscription	Organization
Free	SFDC Config Workbook Test Drive
Duration	Number of Subscribers
Does Not Expire	Site-wide
Username	
admin@swbtest.demo	

At the bottom right, there are two buttons: "Cancel" and "Confirm and Install".

- Click on upgrade or install button

The screenshot shows a "Upgrade Config Workbook" dialog box. It contains a message: "An earlier version is installed. It can be upgraded while preserving the existing data. Installed: SFDC Config Workbook (2.10000) New Version: SFDC Config Workbook (2.10014)". Below the message, there are three radio button options: "Install for Admins Only" (selected), "Install for All Users", and "Install for Specific Profiles...". At the bottom right, there are two buttons: "Upgrade" and "Cancel".

App Name	Publisher	Version Name	Version Number
Config Workbook	ConfigWorkbook	SFDC Config Workbook	2.10014

Description
Quickly extract Salesforce metadata in Excel files, ex. Field Level Security, Profile permissions across objects, fields etc, Page Layouts , Permission set assignments, Apex, Visualforce. It also offers tools like Org Comparator, and Impact Analysis

- Wait for some time . will receive email notification once installation successful.

Install CWB From Config Workbook Site

Config workbook site always have the latest version of CWB. We can install it directly without login to AppExchange

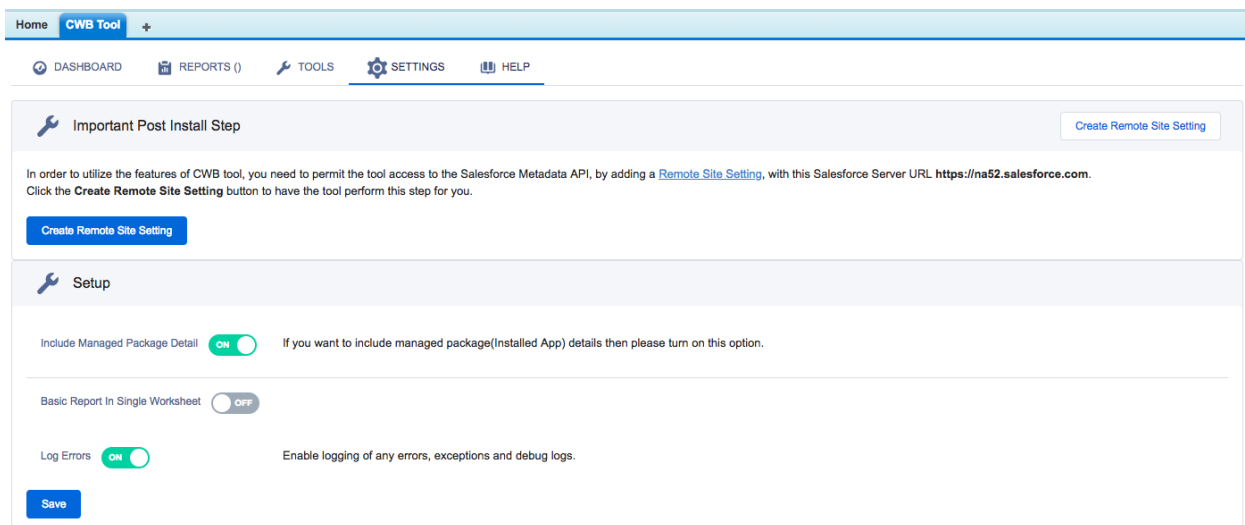

1. Open <http://configworkbook.com>
2. Click on Production or Sandbox Install

3. Enter the Username and Password and follow the instruction which will display after successful login

POST INSTALL STEP

1. Create a remote site setting to white list your domain for callouts. Click on **Remote Site Setting** Link or Button

2. Now CWB Tool is ready for metadata report download.

Download Object metadata Report

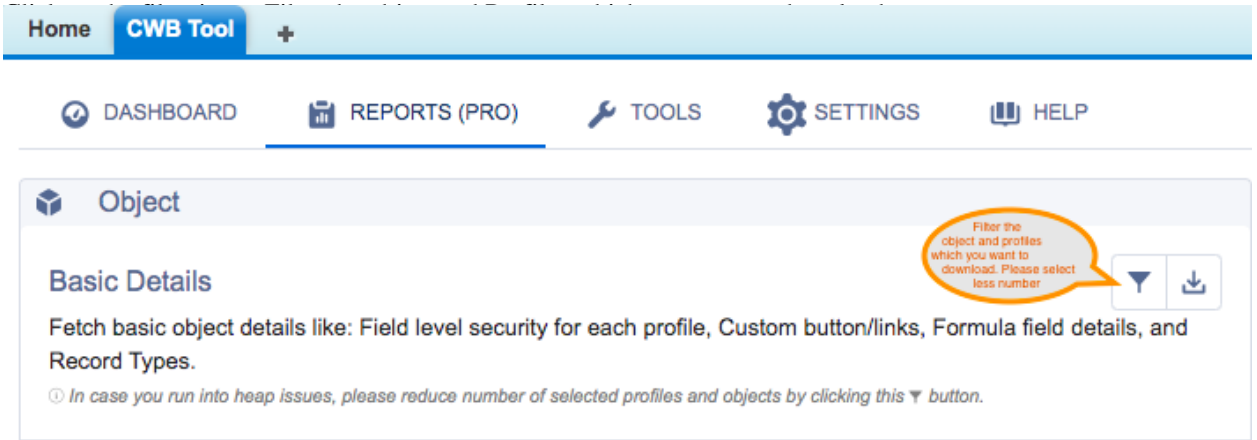

Object Basic Report

Use Basic report when you need basic detail along with Profile FLS. Basic report capabilities for many objects allow you to download metadata in a single excel sheet . Smaller selection improves performance. Fetch basic object details like: Field level security for each profile, Custom button/links, Formula field details, and Record Types.

Note: In case you run into heap issues, please reduce the number of selected profiles and objects by clicking on the filter icon button.

Follow the below steps to download basic object detail

1.

Home CWB Tool +

DASHBOARD REPORTS (PRO) TOOLS SETTINGS HELP

Object

Basic Details

Fetch basic object details like: Field level security for each profile, Custom button/links, Formula field details, and Record Types.

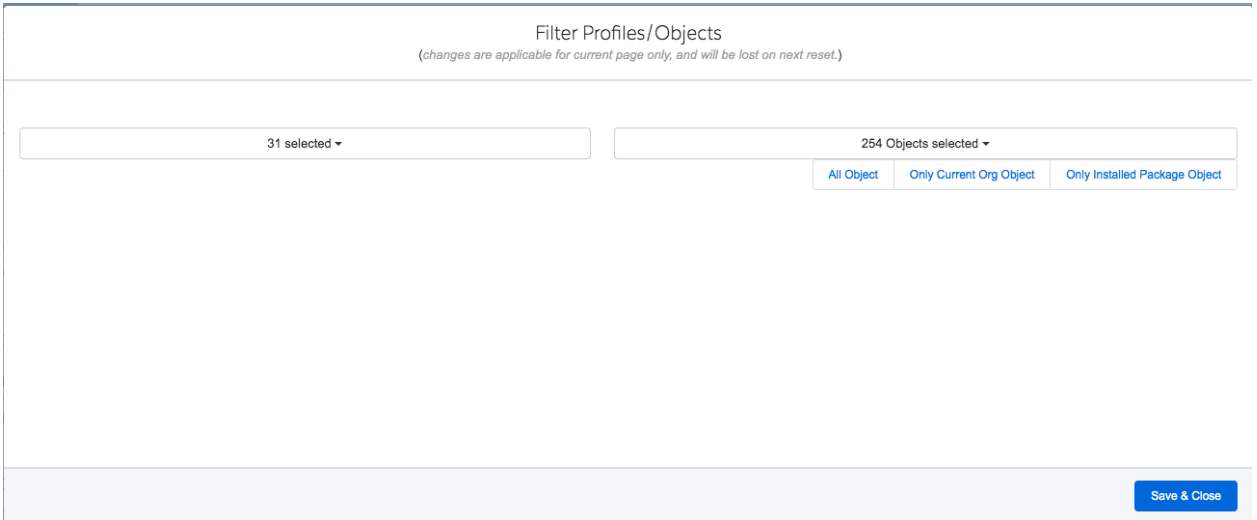

In case you run into heap issues, please reduce number of selected profiles and objects by clicking this ▼ button.

Filter the object and profiles which you want to download. Please select less number

▼

Download

2. If managed object is not available in object Dropdown then go to the CWB Tool->Settings tab and include Managed Package Detail. Select Object(s) and Profiles and click on **Save&Close**

Filter Profiles/Objects
(changes are applicable for current page only, and will be lost on next reset.)

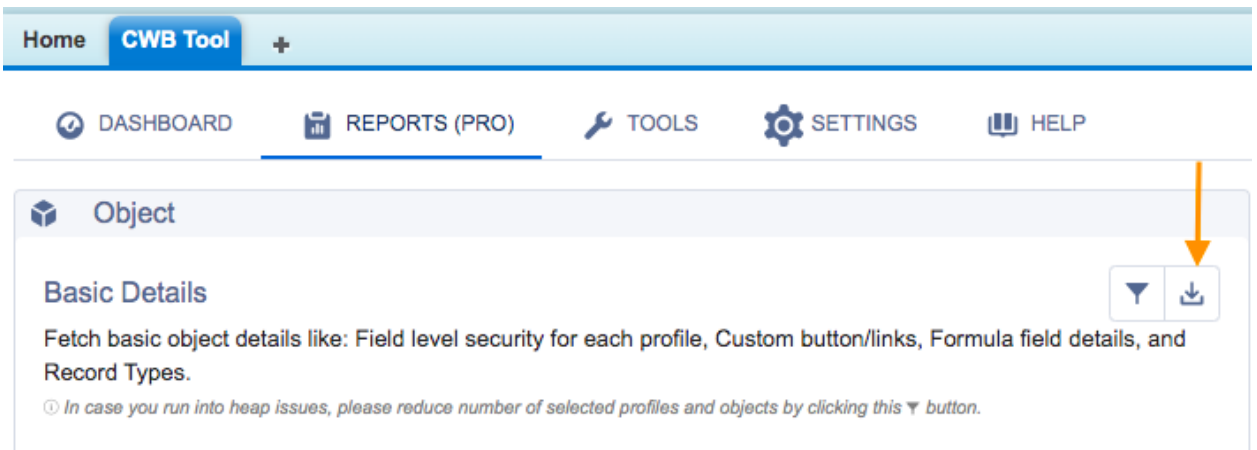

31 selected ▼

254 Objects selected ▼

All Object Only Current Org Object Only Installed Package Object

Save & Close

3. Click on Download

Home CWB Tool +

DASHBOARD REPORTS (PRO) TOOLS SETTINGS HELP

Object

Basic Details

Fetch basic object details like: Field level security for each profile, Custom button/links, Formula field details, and Record Types.

In case you run into heap issues, please reduce number of selected profiles and objects by clicking this ▼ button.

▼

Download

4. Your report will be downloaded in your local machine.

			test2__c			true		

Download Lightning Component

You can download lightning component detail in zip or excel. It will have all the JS code in single file.

Download Visual Flow

Explore visual flow details like Variable, Action Calls, Apex Plugin Calls, Assignment, Choices, Constant, Decision, DynamicChoiceSet, Formula, Loop, Meta data Value, RecordCreate, RecordDelete, RecordLookup, RecordUpdate, Screen, Step, Subflow, TextTemplate and Wait Event etc.

Download Flow Modified Detail

For all Flow, explore who Created & LastModified, with dates and time.

Download Permission Set

Permission Set Basic Detail

Fetches read/edit permission details for each field in every object across all permission sets.

1. Click on Filter icon
2. Select Object and Permission Set
3. Click on Save&Close button

4. Click on Download Icon
5. Report will download your local Machine

Permission Set Full Detail

Fetches all the permission set details for Application Visibilities, Class Accesses, Custom Permissions, External DataSource Access, Field Permissions, Object Permissions, Page Access, RecordType Visibilities, TabSettings, and User License.

1. Click on Download Icon
2. Select Permission Set
3. Click on Download Button
4. Select Download Permission Set
5. Report will download your local Machine

Permission Set Assignment Detail

1. Click on Download Icon under **Permission Set->Full Detail**
2. Select Permission Set
3. Click on Download Button
4. Select Download Permission Set Assignment Detail
5. Report will download your local Machine

Permission Set Modified Detail

Explore who created or modified Permissionset .

1. Click on Download Icon under **Permission Set->Permissionset Modified Detail**
2. Report will download your local Machine

Permission Set Tab Visibility Detail

Explore Tab Visibility in Permission Set .

Download Custom Application

Explore deep details about custom applications like Application Components, Domain Whitelist, Workspace Mappings, Keyboard Shortcuts, Live Agent Config, and Push Notifications.

Download Apex Code

Explore fine details about:

1. Apex : List of all classes, code coverage, namespace prefix, validity, created/last modified info, api version, code coverage, and length without comments. 2. Apex/VF Components and pages: Lists all components/pages with created/last modified info, namespace prefix, and api version etc. 3. Triggers : List of all triggers, code coverage, object name, associated DML events, namespace prefix, code coverage, validity, created/last slds-media__bodyified info, api version, and length without comments.

1. Click on Download Icon under **Apex Code**
2. Report will download your local Machine
